

Week 2 Advanced Analytics - Quick Review Log

Updated: 2026-07-09

Item	Quick Review
Notebook	week2/2.1_Advanced_Analytics.ipynb
Inputs	Week 1 cleaned_sales.csv + four feature tables
Outputs	week2/outputs/week2/ CSVs and PNG charts
Core Work	Time-series, customer value, market aggregation, visual insights
Validation	Run All passed from both project root and week2 folder

Findings & Results Summary

- Time-series: September 2011 showed the strongest MoM revenue increase; growth was supported by order count, active customers, and AOV.
- Customer value: repeat buyers represented 65.58% of customers, while High Value customers contributed about 74.68% of revenue.
- Market view: the UK remained the core revenue base, but also created concentration risk; non-UK markets need stability checks before expansion.
